I am a skilled software developer with experience in creating innovative solutions for both frontend and backend applications. With a strong background in building web applications using Vue.js and Node.js, I excel at delivering scalable and efficient solutions. Proficient in AWS, Serverless, and GraphQL, I am passionate about solving complex problems and collaborating with cross-functional teams to make a meaningful impact in software engineering.

Employment history

Jan 2024 - Present

Graduate Software Developer

Ozgene at Perth, Western Australia, Australia · On-site

- Develop in-house applications for vivarium control, task scheduling, and shop interfaces, enhancing system efficiency.
- Manage frontend and backend development, ensuring scalable solutions and improved performance.
- Oversee server management using AWS, Serverless, and GraphQL, providing comprehensive IT support.
- Collaborate with cross-functional teams to enhance application functionality, significantly improving user experience.

Jun 2023 - Jul 2023

Associate Software Developer

NamSource at Perth, Western Australia, Australia

- Developed JSON data models for Crudio, enhancing rapid prototyping in education, healthcare, retail.
